

## Three Power Settings One Light - One Price!

Affordable, portable and durable LED light that has the ability to do both acupressure point work and deep tissue work. Use the lower setting when you are working on meridian acupressure points, virus points and skin surface wounds. Use the middle and high settings to drive the light a little deeper and faster into tight muscle.

The ability to interchange the colored heads allows you the use of different colors without the need for several different lights.

## Red Light Therapy

Red Light (Photonic) Therapy has been researched for over 40 years by NASA and cleared by the FDA as a safe, natural, non-invasive way to promote healing and control pain. The AAH Light emits a specialized 660nm red light which can be applied directly to the skin.

- Increases circulation
- Relaxes muscles
- Reduces pain and swelling
- Accelerates cellular regeneration
- Increase the Nitric Oxide levels
- Stimulates the ATP (Adenosine Triphosphate) production
- Increases lymphatic activity
- Increases anti-viral properties
- Encourages collagen production
- Stimulates acupuncture points and immune response
- Reduces scar tissue and stimulates wound healing
- No reported side effects

Red light will act to tonify and encourage heat in an area by increasing the circulation. Additionally, when the light is applied to an acupuncture point or damaged cell, the brain receives a signal to release endorphins (natural pain killers) and serotonin into the body.

## Blue Light Therapy

Blue light (410nm) will act to sedate the area which it is applied and is effective to remove inflammation or heat (ice the injury). Blue light is great for pain and acute conditions.

Blue light is also scientifically proven to kill bacteria including the P. acnes bacterium which causes acne. Other skin conditions such as wrinkles, sun damage, anti-aging, skin cancer, cosmetic skin improvement, warts, psoriasis, rosacea will improve with use of the blue AAH Light.

## Green Light Therapy

The color green (530nm) is in the middle of the color spectrum and creates a natural balancing effect on the body. Green is considered a cooler color and helps bring about a slightly sedative effect which will also help with sleeplessness.

Green light therapy promotes balance and calm in the skin while reducing redness, as well as bringing the organs and body systems into balance.

## Light Therapy Benefits

Visible light penetrates the skin tissue 8-10mm, and is beneficial in the treatment of numerous conditions and ailments, some of which are:

- Acute/Chronic Injuries
- Arthritis/Joint Pain
- Body pain and soreness
- Burns
- Colic/digestion issues
- Cough/Cold
- Circulation
- Edema
- Viral Infections (Red light)
- Bacterial Infections (Blue/UV light)
- Muscle strains and tears
- Tendon/Ligament/Stifle/Hock Injuries
- Cuts and open wounds
- Immune System Disorders
- Scars
- Lameness/Laminitis

And much, much more!

## Super easy to use!

Edema - lights placed on an area 10-15 seconds...

*"This pup was brought to me yesterday in unbearable pain from a disease called hypertrophic osteodystrophy (HOD). He was whining, crying, and generally stressed. My friend allowed me to borrow her AAH Light, and he is significantly improved in 18 hours!! I wouldn't believe it if I hadn't seen it. I used to think the light therapy was cuckoo for cocoa puffs. Not any more!!"*

*Katie Stephens, DVM*

*"Not on purpose but I tested the lite in the washer! I left it in my coat and threw it in the washer, then when I realized where it was, I stopped the washer and got the coat and the lite wasn't in the pocket. I turned to the washer and saw the lite on!!! Thanks for making it water tough!!! It has been clear thru to the rinse cycle! 5stars!!"*

*Becky Bateman, AAH Light User*

*"I used it a lot Sunday and Monday on my forearms that are being treated by a chiropractor to break down adhesions that are causing carpal tunnel symptoms. He said my arms were the best he had seen (felt?) them on Tuesday. Also has made my rotator cuff feel incredibly better."*

*Lyssa P, Registered Veterinary Technician*
